and New England Public Policy Center of the
Federal Reserve Bank of Boston
Motivation

- Promote better public policy by conducting objective research and analysis of regional economic/policy issues.

- Understand the long-term labor force challenges facing the regional labor markets in Massachusetts.

- Provide detailed data on labor supply and demand trends to support workforce development policy discussions at a local level.

- Build off the labor market work of Harrington and Fogg (2008) and the demographics research of Sasser Modestino (2009, 2010).
The Southeast Region
The Southeast region was one of the hardest hit regional labor markets in the Great Recession, resulting in the highest unemployment rate of all regional labor markets.

Despite gains in the educational attainment of its labor force in the past decade, the region still has one of the highest shares of individuals with a High School Degree or less.

Addressing the barriers to full employment facing the regions unemployed, particularly among the young and less educated, is key to the recovery of the Southeast region.

Public institutions in the region play a sizeable role in the supply of post-secondary educated labor.
Outline

- Labor Market Performance
- Labor Supply
- Labor Demand
- The Pipeline: Educational Supply of Post-Secondary Degrees
Labor Market Performance

- National and State Employment Trends
- Performance of Regional Labor Markets
- Employment Trends by Industry in the Southeast Region and Massachusetts
Massachusetts is still far below its peak employment levels of the early 2000’s.
The Southeast region was one of the hardest hit regional labor markets in the Great Recession and is recovering modestly.

Labor Supply

- Residential Population Changes and Characteristics
- Age and Education of the Civilian Labor Force
- Trends and Characteristics of the Unemployed
- Commuting Patterns
The Southeast region experienced one of the fastest growing residential populations of all regions in the past decade.

**Total Residential Population Growth**

Growth in immigrant and minority populations accounted for nearly all of the growth in the residential population.

**Demographic Characteristics of the Southeast**

The trends in educational attainment and aging leave the region with potential shortfalls of workers in nearly every category.

Source: U.S. Census Bureau 2008-2010 ACS PUMS data files.
In the Great Recession the unemployment rate reached 9.6 percent in the Southeast region, highest among all regions.
The highest unemployment rates were reached in Greater New Bedford (11.3 percent) and Bristol County (10.7 percent).
The unemployed in the Southeast region are disproportionately younger and have lower levels of educational attainment.

The Pipeline: Educational Supply of Post-Secondary Degrees

- Enrollment Patterns
- Degree Completions
- Major Fields of Study by Degree Type
Enrollment at higher educational institutions in the region has varied by type of institution and enrollment status.
Growth in certificate and degree completions in the region exceeded statewide trends in the past decade.

Annual Growth in Completions, 2000 to 2010

Public institutions account for a larger share of Associate’s and Bachelor's Degrees completions in the region than statewide.

Health Sciences and Services have accounted for most of the Certificates completed in the Southeast region.

**Annual Certificate Completions by Major in the Southeast Region, 2000 to 2010**

- Education
- Engineering & Computer Sciences
- Business
- Services
- Health Sciences

Associate’s Degree completions have been in a number of fields of study, with more coming in Health Sciences in recent years.

**Annual Associate’s Degree Completions by Major in the Southeast Region, 2000 to 2010**

- Engineering & Computer Sciences
- Services
- Business
- Arts, Humanities, & Social Sciences
- Health Sciences

Art, Humanities, & Social Sciences accounted for nearly half of all Bachelor’s Degrees completed in the Southeast region.

Annual Bachelor’s Degree Completions by Major in the Southeast Region, 2000 to 2010

Summary

- In the Great Recession, the region experienced a steep decline in employment and large increase in unemployment that positioned the region for a tough labor market recovery.
- While educational attainment of the region’s labor force has increased more rapidly in the Southeast region than statewide in the past decade, it still has one of the highest shares of individuals with a High School Degree or less.
- Addressing the employment barriers facing the region’s unemployed, particularly among the young and less educated, is one key to the recovery of the Southeast region.
- Given such trends, what should be done to ensure the future economic vitality of the Southeast region moving forward?
Thank You
