Consumer confidence data for New England are collected by the Conference Board in conjunction with the Conference Board's overall U.S. confidence series, and are evaluated on the same basis. Statistics for both the United States and New England are indexed to the U.S. average for 1985. Mass Insight adjusts the Massachusetts figures to be generally comparable to the Conference Board figures. Consumers' assessments of their present situation and expectations about the future are components of the overall consumer confidence index.

Note: For each state, the table shows general revenues (including all taxes and fees) and the two historically largest sources of tax revenues. These revenues are preliminary estimates generated by each of the New England states and are unaudited and subject to revision. For all states, the "Income Tax" column reports revenues from the individual income tax. Rhode Island and Vermont refer to this category as collections from the "personal income tax." Maine uses the term "individual income tax" collections. Annual totals are for the July through June fiscal years. For example, FY2003 is the sum of collections for the 12 months from July 2002 through June 2003.
