Indicators Interactive

*For years, you've read our tables and charts....
Now you can create your own!*

<http://www.bos.frb.org/economic/nee>

- Generate tables and charts for the data series, states, or metropolitan areas you are most interested in... on the fly!

- Get your data in one of three ways:

- The **Quick Summary** shows the most current data with prior and year-ago periods
- The **Indicators Summary** shows the traditional tables from the printed *Indicators* publication, with charts
- The **Custom Query** displays actual data or percent changes for the time periods you specify, with charts

- Easily export your data directly to a comma separated value (CSV) file

Please let us know what you think: bos.webmaster@bos.frb.org

Table continued

The industries for which employment data are reported on pages 5-8 represent the "supersectors" defined by the North American Industry Classification System (NAICS). For all New England states, the Bureau of Labor Statistics publishes seasonally adjusted employment data for all supersectors, with the exceptions of Information (seasonally adjusted data available for Connecticut, Massachusetts, and New Hampshire only) and Natural Resources and Mining (data available for Maine only). Not seasonally adjusted data for all supersectors can be found on the *Indicators* web site: <http://www.bos.frb.org/economic/nee/>.

Note: For each state, the table shows general revenues (including all taxes and fees) and the two historically largest sources of tax revenues. **These revenues are preliminary estimates generated by each of the New England states and are unaudited and subject to revision.** For all states, the "Income Tax" column reports revenues from the individual income tax. Rhode Island and Vermont refer to this category as collections from the "personal income tax." Maine uses the term "individual income tax" collections. Annual totals are for the July through June fiscal years. For example, FY2003 is the sum of collections for the 12 months from July 2002 through June 2003.

Source: American Bankruptcy Institute.

Total bankruptcies represent the number of business filings (Chapters 7, 11, 12, and 13) plus the number of consumer or personal filings (Chapters 7, 11, and 13). The American Bankruptcy Institute compiles and distributes these data, which are initially released by the Administrative Office of the U.S. Courts.

A Portrait of New England's Immigrants

Research Report by Antoniya Owens, former research associate

This research report uses the most recent available data to construct a detailed demographic, labor, and socioeconomic portrait of New England's immigrants. It is the latest in a series of publications from the Center on the movement of people into and out of our region.

The report evaluates the size, relative share, settlement patterns, and national origins of the region's immigrants, and explores how these have changed in recent decades. It then describes the demographic characteristics of the region's foreign-born residents, and analyzes their labor force behavior. Finally, the report evaluates immigrants' socioeconomic status and reliance on public assistance as well as their civic contributions. Throughout the report, the author explores differences between immigrants in the region and in the nation as a whole, as well as between immigrants in the northern three New England states and those in the southern three. The report concludes with recommendations of how states can sustain and enhance the economic potential and social integration of their immigrants.
