New England Economic

Indicators Interactive

*For years, you've read our tables and charts....
Now you can create your own!*

<http://www.bos.frb.org/economic/nei>

- Generate tables and charts for the data series, states, or metropolitan areas you are most interested in... on the fly!

- Get your data in one of three ways:

- The **Quick Summary** shows the most current data with prior and year-ago periods
- The **Indicators Summary** shows the traditional tables from the printed *Indicators* publication, with charts
- The **Custom Query** displays actual data or percent changes for the time periods you specify, with charts

- Easily export your data directly to a comma separated value (CSV) file

Please let us know what you think: bos.webmaster@bos.frb.org

Table continued

The industries for which employment data are reported on pages 5-8 represent the "supersectors" defined by the North American Industry Classification System (NAICS). For all New England states, the Bureau of Labor Statistics publishes seasonally adjusted employment data for all supersectors, with the exceptions of Information (seasonally adjusted data available for Connecticut, Massachusetts, and New Hampshire only) and Natural Resources and Mining (data available for Maine only). Not seasonally adjusted data for all supersectors can be found on the *Indicators* web site: <http://www.bos.frb.org/economic/nee/>.

Note: For each state, the table shows general revenues (including all taxes and fees) and the two historically largest sources of tax revenues. **These revenues are preliminary estimates generated by each of the New England states and are unaudited and subject to revision.** For all states, the "Income Tax" column reports revenues from the individual income tax. Rhode Island and Vermont refer to this category as collections from the "personal income tax." Maine uses the term "individual income tax" collections. Annual totals are for the July through June fiscal years. For example, FY2003 is the sum of collections for the 12 months from July 2002 through June 2003.

Source: American Bankruptcy Institute.

Total bankruptcies represent the number of business filings (Chapters 7, 11, 12, and 13) plus the number of consumer or personal filings (Chapters 7, 11, and 13). The American Bankruptcy Institute compiles and distributes these data, which are initially released by the Administrative Office of the U.S. Courts.

Note: Quarter I and Quarter II 2008 figures were incorrect for Maine and Massachusetts in the October 2008 issue but have been corrected here.

The Future of the Skilled Labor Force in New England: The Supply of Recent College Graduates

Research Report by Alicia Sasser, senior economist

One of New England's greatest assets is its skilled labor force, historically an engine of economic growth in the region. Yet the population of recent college graduates—the skilled labor force of the future—has been growing more slowly in New England than elsewhere in the country.

Since 2000, the number of individuals aged 22–27 years with a bachelor's degree or higher has grown only 8.7 percent in New England—roughly half the increase experienced nationally. That is better than the 11 percent drop in the number of recent college graduates that the region faced in the previous decade. However, the increase since 2000 has not offset those earlier losses, making New England the only region to see a decline in this population since 1990.

The need to attract and retain recent college graduates has become a salient issue in every New England state. Policymakers and business leaders alike are concerned that an inadequate supply of skilled workers will hamper economic growth by creating barriers for companies looking to locate or expand within the region. Indeed, some firms are reporting having difficulty finding skilled workers.

However, policymakers have taken only preliminary steps to tackle this challenge because they lack information on the extent of the problem, its root causes, and how best to address it. To help close that gap, this report explores several key questions, including which factors affect New England's stock of recent college graduates, how those factors have changed over time, and their relative importance in explaining the recent slowdown. The ensuing analysis leads to several conclusions that run contrary to conventional wisdom.

4th Annual Conference Planned

Employing the Region's Assets: Baby Boomers Meeting New England's Skilled Workforce Needs

December 3, 2008
8:00 am to 1:00 pm

Current demographic trends in New England point to a potential shortage of skilled labor as the Baby Boomers begin to retire over the next few years and the working age population begins to shrink. With current benefits and workplace policies that nudge older workers in the direction of retirement, older workers are one of the largest untapped human capital resources in the region.

The New England Public Policy Center's 4th annual conference will explore the role that older professionals can play in meeting the region's labor force needs over the next 20 to 30 years. The conference will feature presentations that investigate the changing demographic and labor force trends in New England and the US and examine what employers, employees, and the public sector can do to lengthen the labor force participation of the population age 55 and older.

This conference is free and open to the public. Registration is required. To register, visit the Center's website: <http://www.bos.frb.org/economic/neppc/>
