Mismatch in the Labor Market?

Ensuring an Adequate Supply of Skilled Labor in New England

Tuesday, November 30, 2010

8:30 a.m. - noon

Federal Reserve Bank of Boston

New England Room, 4th Floor

600 Atlantic Avenue, Boston MA

*This forum is free and open to the public, but registration is required.

Over the past decade, policymakers and business leaders across New England have been concerned that the region's slower population growth and loss of residents to other parts of the U.S. will lead to a shortage of skilled labor—particularly when the baby boom generation retires. Even with the current economic downturn, there is a recognized need to ensure that there is a sufficient pipeline of skilled workers to fill their region's high-growth, high-demand jobs when the economy recovers—many of which are likely to require post-secondary education and training. This means not only having a sufficient number of skilled workers, but also a workforce with the right mix of skills to meet the diverse needs of the region's economy.

This forum will feature new research by the Federal Reserve Bank of Boston's New England Public Policy Center that explores the potential mismatch between the supply of and demand for skilled labor in New England. The forum is one of the ongoing efforts of the Center, which the Federal Reserve Bank of Boston established in 2005 to provide policy makers and the public with unbiased information on key policy issues. It intends to provide policy makers, policy practitioners, and regional thought leaders who are concerned about region's workforce with a deeper understanding of the relevant issues and possible solutions.

The author and keynote speaker—Alicia Sasser Modestino, Senior Economist at the Policy Center—will describe the magnitude of the potential mismatch, identify particular industries and occupations where skilled labor is in high demand, and project labor supply and demand conditions over the next two decades. She will also discuss several policy solutions designed to address labor shortages in the region, including where future investments in education and training may be warranted.

Indicators

New England Economic
Third Quarter 2010

New England Economic Indicators (issn 0548-4448) is published quarterly by the Federal Reserve Bank of Boston's New England Public Policy Center as a resource for researchers and members of the public interested in the New England economy.

The industries for which employment data are reported on pages 5-8 represent the "supersectors" defined by the North American Industry Classification System (NAICS). For all New England states, the Bureau of Labor Statistics publishes seasonally adjusted employment data for all supersectors, with the exceptions of Information (seasonally adjusted data available for Connecticut, Massachusetts, and New Hampshire only) and Natural Resources and Mining (data available for Maine only). Not seasonally adjusted data for all supersectors can be found on the Indicators web site: <http://www.bos.frb.org/economic/nee/nee.html>.

Note: For each state, the table shows general revenues (including all taxes and fees) and the two historically largest sources of tax revenues. **These revenues are preliminary estimates generated by each of the New England states and are unaudited and subject to revision.** For all states, the "Income Tax" column reports revenues from the individual income tax. Rhode Island and Vermont refer to this category as collections from the personal income tax. Maine uses the term "individual income tax" collections. Annual totals are for the July through June fiscal years. For example, FY2003 is the sum of collections for the 12 months from July 2002 through June 2003.

Sources: Connecticut Department of Revenue Services, Maine Office of the State Controller, Massachusetts Department of Revenue, New Hampshire Department of Administrative Services, Rhode Island State Budget Office, and the State of Vermont Joint Fiscal Office.

Source: American Bankruptcy Institute.

Total bankruptcies represent the number of business filings (Chapters 7, 11, 12, and 13) plus the number of consumer or personal filings (Chapters 7, 11, and 13). The American Bankruptcy Institute compiles and distributes these data, which are initially released by the Administrative Office of the U.S. Courts.
