Includes data available as of January 4, 2012

# A new year and a new look for Indicators...

Dear Indicators subscriber,

A recent survey of *New England Economic Indicators* subscribers provided valuable insight into how the publication is used and how it might be improved. Many subscribers recommended making the publication more visually appealing and enhancing understanding of New England economic trends. In response to these suggestions we will be making changes to the publication in early 2012. This will include improved visual displays and brief analysis of select regional data series.

As a current subscriber, you will receive the first edition of the new *Indicators* in 2012. **You are required to renew your subscription to receive subsequent editions.** Renewal instructions will be provided in that edition.

While the publication format will change, *Indicator's* website will continue to feature the most up-to-date data and information on relevant economic trends in the region. This includes monthly economic summaries for each New England state, raw time-series data for all series tracked in *Indicators*, and Indicators Interactive, an application that allows you to generate customized tables and charts for the geography or data series you are interested in.

We hope you will share your feedback on these changes and provide suggestions on ways to continue to improve Indicators. So please, keep an eye out for the changes in 2012 and let us know what you think.

Sincerely,

Robert Clifford, Indicators Editor  
robert.clifford@bos.frb.org

The industries for which employment data are reported on pages 5-8 represent the "supersectors" defined by the North American Industry Classification System (NAICS). For all New England states, the Bureau of Labor Statistics publishes seasonally adjusted employment data for all supersectors, with the exceptions of Information (seasonally adjusted data available for Connecticut, Massachusetts, and New Hampshire only) and Natural Resources and Mining (data available for Maine only). Not seasonally adjusted data for all supersectors can be found on the Indicators web site: <http://www.bos.frb.org/economic/nee>.

Note: For each state, the table shows general revenues (including all taxes and fees) and the two historically largest sources of tax revenues. **These revenues are preliminary estimates generated by each of the New England states and are unaudited and subject to revision.** For all states, the "Income Tax" column reports revenues from the individual income tax. Rhode Island and Vermont refer to this category as collections from the personal income tax. Maine uses the term "individual income tax" collections. Annual totals are for the July through June fiscal years. For example, FY2003 is the sum of collections for the 12 months from July 2002 through June 2003.

Sources: Connecticut Department of Revenue Services, Maine Office of the State Controller, Massachusetts Department of Revenue, New Hampshire Department of Administrative Services, Rhode Island State Budget Office, and the State of Vermont Joint Fiscal Office.

## Total Bankruptcies (number of business and consumer filings, not seasonally adjusted)

Source: American Bankruptcy Institute.

Total bankruptcies represent the number of business filings (Chapters 7, 11, 12, and 13) plus the number of consumer or personal filings (Chapters 7, 11, and 13). The American Bankruptcy Institute compiles and distributes these data, which are initially released by the Administrative Office of the U.S. Courts.
