Note: Population data are adjusted to reflect fiscal years. New England average is a population-weighted average across the six states. Excludes revenues associated with utilities, liquor stores, and social insurance trusts. The sharp increase in New Hampshire’s property tax collections between FY 1999 and 2000 reflects the enactment of the statewide education property tax. The increase in New Hampshire’s intergovernmental revenues in the early 1990s is likely due to increased use of Medicaid financing arrangements.

Note: Population data are adjusted to reflect fiscal years. New England average is a population-weighted average across the six states. Local government data for individual states not available for FY 2001 and 2003. Excludes revenues associated with utilities, liquor stores, and social insurance trusts. The increase in New Hampshire’s intergovernmental revenues in the early 1990s is likely due to increased use of Medicaid financing arrangements.

Note: Population data are adjusted to reflect fiscal years. New England average is a population-weighted average across the six states. Excludes expenditures associated with utilities, liquor stores, and social insurance trusts, as well as intragovernmental expenditures such as pension contributions. The increase in New Hampshire's public welfare expenditures in the early 1990s is likely due to increased use of Medicaid financing arrangements.

Note: Population data are adjusted to reflect fiscal years. New England average is a population-weighted average across the six states. Local government data for individual states not available for FY 2001 and 2003. Excludes expenditures associated with utilities, liquor stores, and social insurance trusts, as well as intragovernmental expenditures such as pension contributions. The increase in New Hampshire's public welfare expenditures in the early 1990s is likely due to increased use of Medicaid financing arrangements.

Note: Population data are adjusted to reflect fiscal years. Weighted averages are population-weighted averages. Five-state averages exclude New Hampshire. United States average is a population-weighted average. Excludes revenues associated with utilities, liquor stores, and social insurance trusts. The sharp increase in New Hampshire’s property tax collections between FY 1999 and 2000 reflects the enactment of the statewide education property tax. The increase in New Hampshire’s intergovernmental revenues in the early 1990s is likely due to increased use of Medicaid financing arrangements.

Note: Population data are adjusted to reflect fiscal years. Weighted averages are population-weighted averages. Five-state averages exclude New Hampshire. United States average is a population-weighted average. Local government data for individual states not available for FY 2001 and 2003. Excludes revenues associated with utilities, liquor stores, and social insurance trusts. The increase in New Hampshire's intergovernmental revenues in the early 1990s is likely due to increased use of Medicaid financing arrangements. The increase in New Hampshire's public welfare.

Note: Population data are adjusted to reflect fiscal years. Weighted averages are population-weighted averages. Five-state averages exclude New Hampshire. United States average is a population-weighted average. Excludes expenditures associated with utilities, liquor stores, and social insurance trusts, as well as intragovernmental expenditures such as pension contributions. The increase in New Hampshire’s public welfare expenditures in the early 1990s is likely due to increased use of Medicaid financing arrangements.

Five-state averages exclude New Hampshire. United States average is a population-weighted average.

Local government data for individual states not available for FY 2001 and 2003. Excludes expenditures associated with utilities, liquor stores, and social insurance trusts, as well as intragovernmental expenditures such as pension contributions. The increase in New Hampshire’s public welfare expenditures in the early 1990s is likely due to increased use of Medicaid financing arrangements.
